## DIMMING OPERATION

- The Pulse-Width Modulation (PWM) of output voltage can be adjusted through input terminal of the AC phase line(L) by connecting a triac dimmer
- Match with leading edge Triac Dimmer (Can customized as a driver only matching trailing edge Triac Dimmers if needed)
- Use dimmers with power at least 2.5 times as the output power of the driver
- For forward phase, magnetic low voltage and Triac dimmers
- 0-10V Dimming: Dim(+) Purple wire to 0-10V dimmer signal(+), Dim(-) Grey wire to 0-10V dimmer signal(-)

## WARNING

- Check polarity
- Risk of Electric Shock. Indoor use only. Suitable for dry and damp locations.
- Risk of Fire. Installation involves special wiring methods to run wiring through a building structure. Consult a qualified electrician.
- Risk of Electric Shock. Mount the unit at a height more than 1 ft (30cm) from the ground
